TECHNICAL SKILLS

Java ,OOPS ,DSA ,Javascript ,React ,Node JS ,Express JS ,Sql ,Github

WORK EXPERIENCE

 React and Node Js developer , Blue planet info solution company   Mar 2025 - Present
- **Club Management System**
 Team Project │ React.js, Node.js
- Collaborated with a team to develop a responsive and user-friendly web application that allows college students to view, join, and manage various college clubs and events on a centralized platform.
- Built an attractive and intuitive interface using React.js for the frontend and Node.js for the backend, ensuring a seamless user experience.

PROJECTS

- **Internship website :-** Built a full-stack internship portal using the MERN stack, enabling companies to post paid internships and candidates to apply seamlessly. Gained hands-on experience in building user authentication, and integrating frontend and backend systems.
- **Spotify-clone React :** Developed the front page of Spotify using React as part of a Let's Upgrade course project. Gained practical experience in component-based design, state management, and responsive UI development.
- **Attendance Bunker :** Built a React-based mini app to calculate how many classes a student can miss based on attendance, total classes, and target percentage. Practiced form handling and state management.
- **Personal Portfolio :** Developed a personal portfolio website using Javascript and Material-UI to showcase my web development skills. Implemented a responsive design to ensure optimal viewing on various devices.
- **Mini projects :** cloned websites like Amazon and UseabilityHub ,Mini Games (Rock Paper Scissor , Tic Tac Toe , Guess the number)
